Lesson 4: Scenes and Messages: Telling a Story

Module 2 | 45 minutes | Broadcasts and timing | Grades 3–5 · ages 8–10

Name: Class: Date:

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. scene ___ A. Characters talking to each other.
b. broadcast ___ B. Start a script when a message arrives.
c. receive ___ C. Send a message to all sprites.
d. dialogue ___ D. A part of a story with its own setting.

2. Plan your code

Before you build it: Make a conversation: the Cat says “Hello, Dog!”, then broadcasts a message; the Dog receives it and replies “Hi, Cat!”. Write or draw the blocks you will use.

3. Follow the message

Put the story events in order Number them 1–5.

a. ___ The Dog receives “dog talk”
b. ___ The Cat broadcasts “dog talk”
c. ___ The Cat says hello
d. ___ The green flag is clicked
e. ___ The Dog replies

4. Why messages?

Why is a broadcast better than guessing a wait time for the Dog? Circle one.

a. A. The Dog always starts exactly when the Cat finishes
b. B. Broadcasts make sprites talk louder
c. C. Waits don’t work in stories

5. Plan your code

Before you build it: Scene change! When the Cat finishes its line, broadcast “scene 2”. The stage should switch to the space backdrop and the Dog (hidden at the start) should appear. Write or draw the blocks you will use.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can make characters take turns with messages.
☐ I can change the scene with a broadcast and a backdrop.
☐ I can plan a story in scenes.
