LESSON PLAN · SCRATCH (GR 3–5) INTERMEDIATE: STORY, QUIZ & MUSIC STUDIO

Lesson 6: Project: Choose-Your-Path Story

Module 2 | 50 minutes | Project: interactive story | Grades 3–5 · ages 8–10

Objective: Plan, build and test an interactive story in scenes, where the reader's answers change what happens.

Success criteria

- My story has two characters and two scenes.
- The reader's answer changes the story.
- I tested every path.

Key vocabulary

- **story map**: A plan showing scenes and the choices between them.
- **ending**: A final scene of one path.
- **path**: One route through a branching story.

You will need

- Projector with Kitabash (lesson video, Code Lab)
- Devices: 1 per learner or pair
- Printed worksheet (optional)
- Printed project brief

Timed lesson plan (50 min)

Time	Stage	What happens
5 min	**Warm-up (unplugged)**	Story-map sketch (5 min): in pairs, draw boxes and arrows for a 3-scene story with one choice.
5 min	**Watch & plan**	Play the project video; learners plan on the project brief.
25 min	**Build**	Build-along steps, then Match each story part to the block that makes it. Check in halfway: everyone has something working.
7 min	**Test & peer feedback**	Swap and test each other's work: two stars and a wish.
8 min	**Improve & submit**	Improve one thing; Project: Choose-Your-Path Story.

Unplugged warm-up

Story-map sketch (5 min): in pairs, draw boxes and arrows for a 3-scene story with one choice.

Teaching the idea

Learners combine dialogue via broadcasts, scene changes and input-driven branching into a story. Planning with a story map is essential; testing every path is the debugging habit to build.

Analogy: A story map is like a train map: stations are scenes, and the reader picks which line to take.

Live demo: Show a story map on the board for a short example and build the branch live.

Questions to ask

Ask	Listen for
How many endings does your story have?	Count the branches.
Which message starts each ending?	Names should be clear and match.
What happens if the reader types something unexpected?	The else branch (a default ending).

Differentiation

Support
Use a provided story frame (door/treasure/dragon) and change the characters and words.

Stretch
Two questions in a row for four possible endings, or a variable that remembers the reader's name for the ending.

Common misconceptions

Misconception	How to fix it
One test is enough	Each path needs its own test.
Every sprite needs the question	Ask once; broadcast the result to the others.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Story & scenes	Hard to follow	One scene	Clear story with 2+ scenes	Engaging story with a strong beginning, middle and end
Messages	No broadcasts	Broadcast used but names mismatch	Turns and scenes run by messages	Messages used cleverly to coordinate several sprites
Input & branching	No question	Question asked but answer unused	Answer branches the story	Several choices or the answer is reused later

Presentation	Little care	Some timing issues	Good timing and backdrops	Polished timing, visuals and characters
Testing & reflection	Not tested	One path tested	Every path tested; reflection explains a fix	Tested with others; thoughtful improvements explained

Exit ticket
How many paths does your story have? Which did you test?

Homework
Ask someone at home to play your story and choose a path you didn’t expect.

Answer key — Kitabash activities

1. Match each story part to the block that makes it (perform · matching)

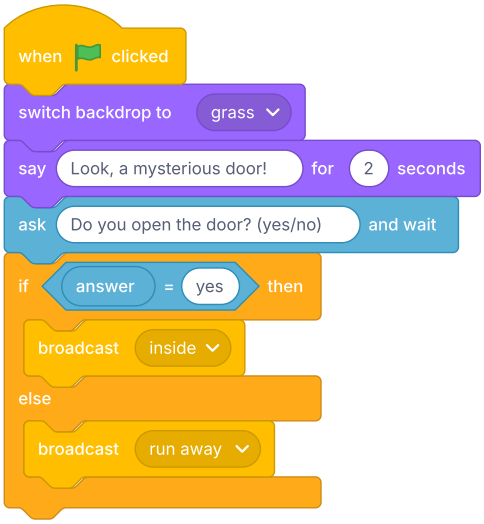

Characters take turns → broadcast + when I receive · The reader makes a choice → ask and wait · The story goes different ways → if-else with the answer · A new place → switch backdrop

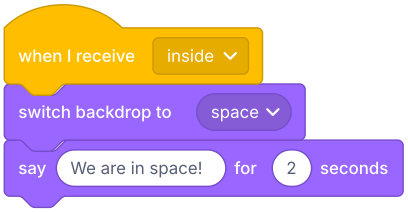

2. Project: Choose-Your-Path Story (probe · code lab)

Goals checked: 2 or more characters · Asks the reader · The answer changes the story · Scenes start with messages · Changes the scene

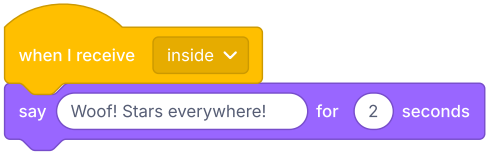

Example project:

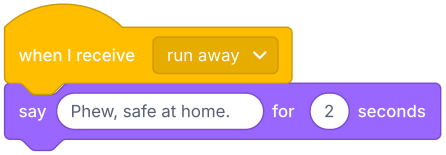

Cat

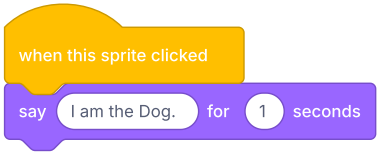

Dog

Answer key — worksheet

1. **Key words:** story map = A plan showing scenes and the choices between them. · ending = A final scene of one path. · path = One route through a branching story.
2. **Match each story part to the block that makes it:** Characters take turns → broadcast + when I receive · The reader makes a choice → ask and wait · The story goes different ways → if-else with the answer · A new place → switch backdrop
3. **My plan:** A clear plan that covers every requirement.
4. **Checklist:** All requirements met.
5. **Two stars and a wish:** Kind, specific feedback and an improvement.
