Lesson 8: Random Questions, Score and Timer

Module 3 | 45 minutes | Random, variables and timing | Grades 3–5 · ages 8–10

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. random ___ A. Add 1 to a variable.
b. score ___ B. Counts seconds since it was reset.
c. timer ___ C. A variable counting correct answers.
d. increment ___ D. Chosen by chance.

2. Plan your code

Before you build it: Random quiz: set score to 0; then 3 times: pick two random numbers (1–10) into a and b, ask “a × b”, and if the answer = a × b change score by 1. Finally say the score. Write or draw the blocks you will use.

3. Reset the score

Why do we put the score at 0 when the green flag is clicked? Circle one.

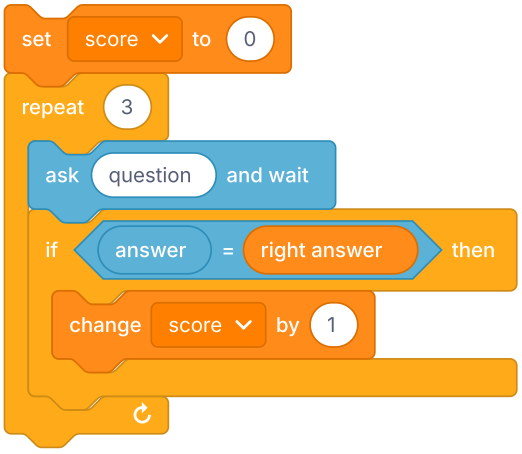

a. A. So each new game starts from zero
b. B. So the questions are random
c. C. So the timer works

4. Plan your code

Before you build it: Beat the clock: when the flag is clicked, reset the timer, wait until the timer is more than 5, then say “Time’s up!” and stop all. Write or draw the blocks you will use.

5. Trace the score

What is the score after the player answers 2 out of 3 questions correctly? Circle one.

a. A. 2
b. B. 3
c. C. 1

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can make random questions with variables.
☐ I can keep score correctly.
☐ I can add a time limit with the timer.
