LESSON PLAN · SCRATCH (GR 3–5) INTERMEDIATE: STORY, QUIZ & MUSIC STUDIO

Lesson 9: Project: Quiz Show

Module 3 | 50 minutes | Project: quiz game | Grades 3–5 · ages 8–10

Objective: Plan, build and test a quiz game with at least five questions, a score, feedback and a final message.

Success criteria

- My quiz asks five questions and checks them.
- The score is correct and starts at 0.
- Players get feedback and a final score.

Key vocabulary

- **feedback**: Telling the player how they did.
- **checkable**: Has one clear right answer the computer can compare.
- **final score**: The score shown at the end.

You will need

- Projector with Kitabash (lesson video, Code Lab)
- Devices: 1 per learner or pair
- Printed worksheet (optional)
- Printed project brief

Timed lesson plan (50 min)

Time	Stage	What happens
5 min	**Warm-up (unplugged)**	Quiz writing (5 min): pairs write five checkable questions on their topic and swap to test.
5 min	**Watch & plan**	Play the project video; learners plan on the project brief.
25 min	**Build**	Build-along steps, then Is it a good quiz question?. Check in halfway: everyone has something working.
7 min	**Test & peer feedback**	Swap and test each other's work: two stars and a wish.
8 min	**Improve & submit**	Improve one thing; Project: Quiz Show.

Unplugged warm-up

Quiz writing (5 min): pairs write five checkable questions on their topic and swap to test.

Teaching the idea

Learners combine input, comparison, variables, operators and feedback in a quiz. Emphasise writing checkable questions and testing with real players.

Analogy: You are both the question writer and the game-show host.

Live demo: Build one question with feedback live, then show how to duplicate the pattern for question 2.

Questions to ask

Ask	Listen for
Is your question checkable?	One clear answer.
What happens on a wrong answer?	Show the right answer kindly.
Where does the score go up?	Inside the correct branch.

Differentiation

Support
Use three questions and the provided template; extend to five if time allows.

Stretch
Random maths rounds plus fact questions, a timer per question, or a high score.

Common misconceptions

Misconception	How to fix it
Spelling doesn't matter when checking	The typed answer must match; keep answers short.
Feedback only for right answers	Wrong answers should teach the right one.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Questions	Fewer than 3 or unclear	3–4 questions	5 clear, checkable questions	Varied, well-written questions (or random rounds)
Checking & score	Answers not checked	Checks but score wrong	Correct checking and score	Extra scoring (bonus, levels, timer)
Feedback	None	Only for correct answers	For every answer	Engaging feedback with sounds and teaching
Ending	No ending	Ends without score	Says final score	Special endings (perfect score, rank)

Testing & reflection	Not tested	Tested alone	Tested by a friend; change explained	Several improvements from testing

Exit ticket
One question from your quiz and how your code checks it.

Homework
Test your quiz on a family member and record their score.

Answer key — Kitabash activities

1. Is it a good quiz question? (perform · categorize)

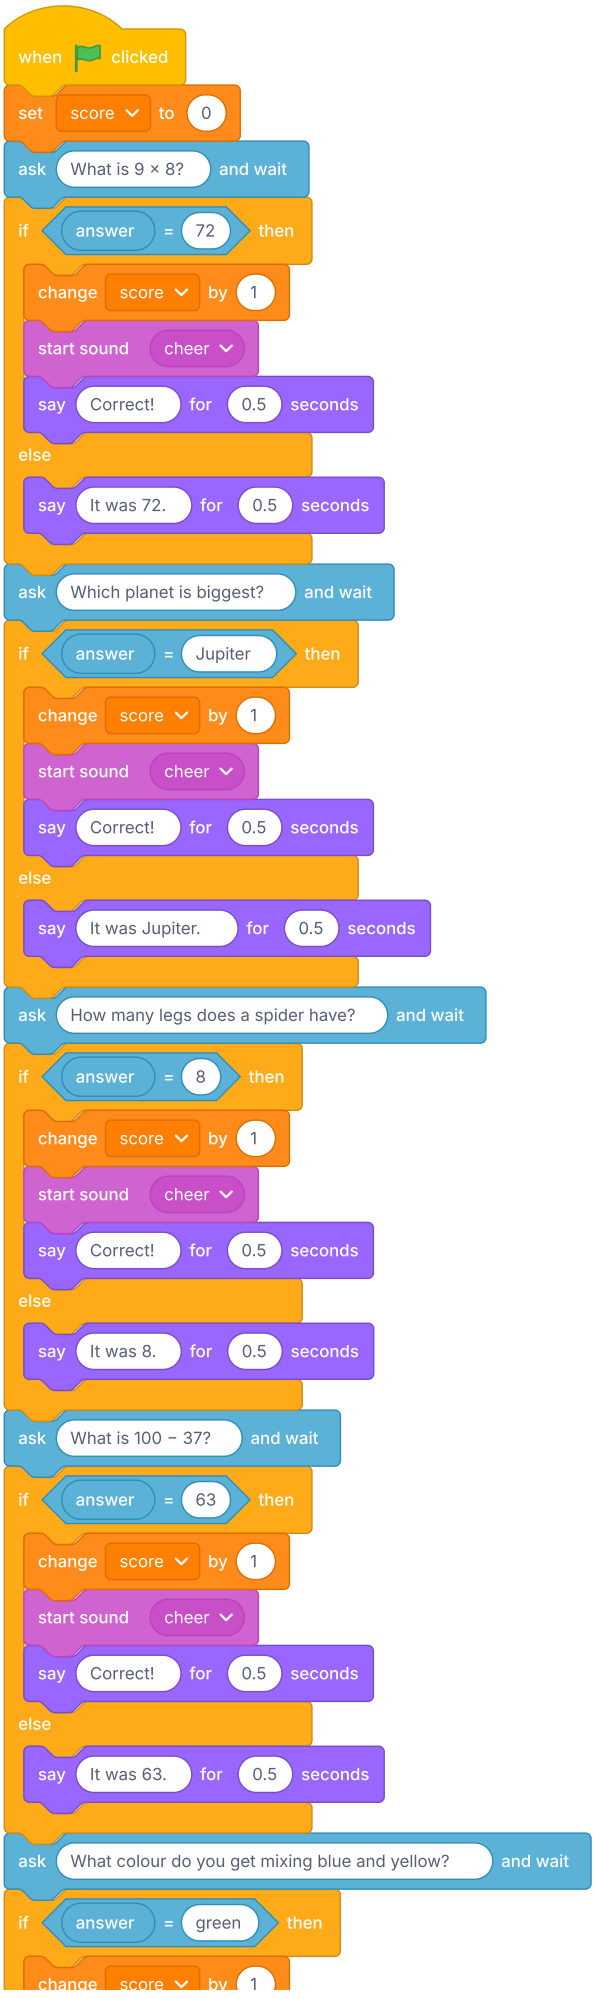

Clear, one answer: What is 9 × 8?, Which planet is biggest?
Unclear or too open: What do you think about space?, Name an animal

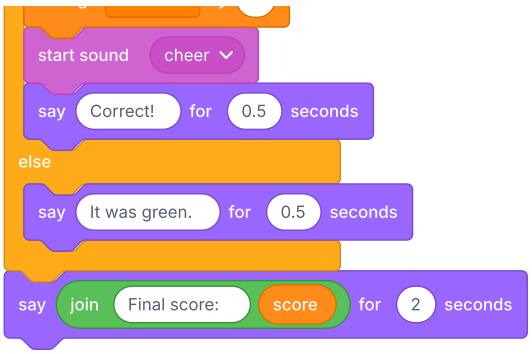

2. Project: Quiz Show (probe · code lab)

Goals checked: Asks at least 5 questions · Checks the answers · Score starts at 0 · Says the final score

Example project:

Host

when clicked
set score to 0
ask What is 9 × 8? and wait
if answer = 72 then
change score by 1
start sound cheer
say Correct! for 0.5 seconds
else
say It was 72. for 0.5 seconds
ask Which planet is biggest? and wait
if answer = Jupiter then
change score by 1
start sound cheer
say Correct! for 0.5 seconds
else
say It was Jupiter. for 0.5 seconds
ask How many legs does a spider have? and wait
if answer = 8 then
change score by 1
start sound cheer
say Correct! for 0.5 seconds
else
say It was 8. for 0.5 seconds
ask What is 100 − 37? and wait
if answer = 63 then
change score by 1
start sound cheer
say Correct! for 0.5 seconds
else
say It was 63. for 0.5 seconds
ask What colour do you get mixing blue and yellow? and wait
if answer = green then
change score by 1

Answer key — worksheet

1. **Key words:** feedback = Telling the player how they did. · checkable = Has one clear right answer the computer can compare. · final score = The score shown at the end.
2. **Is it a good quiz question?:** Clear, one answer: What is 9 × 8?, Which planet is biggest? · Unclear or too open: What do you think about space?, Name an animal
3. **My plan:** A clear plan that covers every requirement.
4. **Checklist:** All requirements met.
5. **Two stars and a wish:** Kind, specific feedback and an improvement.
