LESSON PLAN · SCRATCH (GR 3–5) INTERMEDIATE: STORY, QUIZ & MUSIC STUDIO

Lesson 12: Capstone: My Interactive Show

Module 4 | 90 minutes | Capstone: everything together | Grades 3–5 · ages 8–10

Objective: Design, build, test and present an interactive show that combines story, quiz or music with events, loops, variables and messages.

Success criteria

- My show has two scenes started by messages.
- It uses a loop, a variable and audience interaction.
- I tested it with an audience and improved it.

Key vocabulary

- **running order**: The planned sequence of scenes in a show.
- **audience**: The people who watch and interact.
- **iteration**: Improving in small steps.
- **capstone**: A final project that uses everything you learned.

You will need

- Projector with Kitabash (lesson video, Code Lab)
- Devices: 1 per learner or pair
- Printed worksheet (optional)
- Printed project brief

Timed lesson plan (90 min)

Time	Stage	What happens
10 min	**Session 1 · Plan**	Running-order cards; write the running order in Kitabash.
30 min	**Session 1 · Build**	Scene 1 and the first interaction; test as you go.
5 min	**Session 1 · Save**	Save progress; note what is next.
20 min	**Session 2 · Build**	Scene changes, loops, variables, polish.
10 min	**Session 2 · Test**	Audience test with a partner; improve one thing.
15 min	**Session 2 · Submit & present**	Reflection, submit, 1-minute presentations.

Unplugged warm-up

Running-order cards (10 min): learners order scene cards for their show and act it out in pairs.

Teaching the idea

The capstone integrates nested loops/variables, messages and scenes, input and branching, operators and scoring, and music with events. Learners plan a running order, build iteratively, test with an audience and present.

Analogy: Producing a show: script (plan), rehearsal (testing), and opening night (presentation).

Live demo: Show a 3-scene example combining a greeting, one quiz question and a dance party, and point out each skill used.

Questions to ask

Ask	Listen for
Which message starts each scene?	Clear message names.
How does the audience take part?	Ask, keys or clicks.
Which variable do you use and why?	Score, counter, name...

Differentiation

Support
Use a 2-scene template (welcome + quiz) and add one interaction.

Stretch
Three or more scenes, a high score, or music synced with a beat message.

Common misconceptions

Misconception	How to fix it
More scenes = better show	A short, polished, working show beats a long broken one.
Testing is only at the end	Test each scene as you build it.

Assessment

Project rubric (also on the project brief):

Criterion	1 · Beginning	2 · Developing	3 · Secure	4 · Excellent
Scenes & messages	One scene	Scenes change but messages mismatch	2+ scenes coordinated by messages	Smooth, well-timed multi-scene show
Interaction	None	One simple interaction	Meaningful interaction	Several interactions that change the show

			(questions, keys or clicks)	
Loops & variables	Missing	One used	Both used correctly	Used cleverly (score-based ending, synced loops)
Creativity & polish	Unfinished	Some care	Engaging and complete	Original, polished and fun
Process	No plan or testing	Plan or test	Planned, tested and improved	Iterated several times with feedback
Reflection & presentation	Missing	Brief	Explains a code piece and a change	Clear, confident explanation of learning

Exit ticket
One thing I'm proud of in my show, and one new skill from this course.

Homework
Show your interactive show at home and ask for one improvement idea.

Answer key — Kitabash activities

1. Which skill does each part of a show use? (perform · categorize)

Events: The show starts on the green flag, Pressing a key plays a drum
Loops: Music plays all the way through
Variables: A quiz score goes up, A counter shows how many stars you clicked
Messages: Scene 2 starts after scene 1

2. Running order (probe · free response)

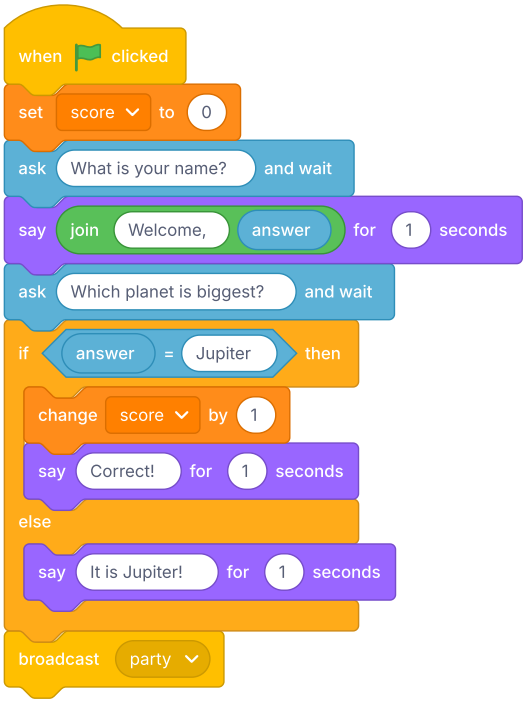

Look for: scene, click, answer, message. **Example:** Scene 1: the Fish welcomes you and asks your name. Scene 2 (message “quiz”): three questions about the ocean, with a score. Scene 3 (message “party”): if your score is 3, the fish dance to music; press keys to play along.

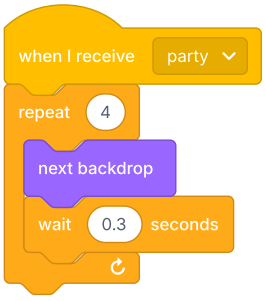

3. Capstone: My Interactive Show (probe · code lab)

Goals checked: 2 or more sprites · Scenes use messages · Uses a loop · Uses a variable · The audience can interact

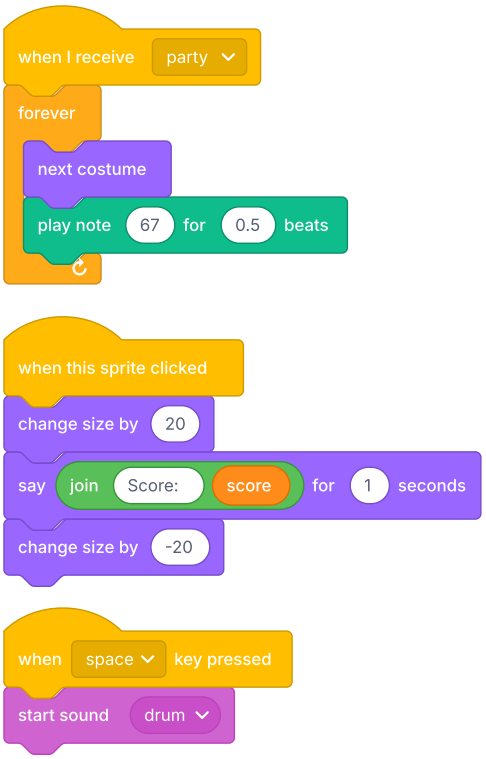

Example project:

Host

Dancer

Answer key — worksheet

1. **Key words:** running order = The planned sequence of scenes in a show. · audience = The people who watch and interact. · iteration = Improving in small steps. · capstone = A final project that uses everything you learned.
2. **Which skill does each part of a show use?:** Events: The show starts on the green flag, Pressing a key plays a drum · Loops: Music plays all the way through · Variables: A quiz score goes up, A counter shows how many stars you clicked · Messages: Scene 2 starts after scene 1
3. **Running order:** Scene 1: the Fish welcomes you and asks your name. Scene 2 (message “quiz”): three questions about the ocean, with a score. Scene 3 (message “party”): if your score is 3, the fish dance to music; press keys to play along.
4. **My plan:** A clear plan that covers every requirement.
5. **Checklist:** All requirements met.
6. **Two stars and a wish:** Kind, specific feedback and an improvement.
