WORKSHEET · SCRATCH (GR 6–8) ADVANCED: ALGORITHMS LAB

Lesson 7: Strings: Working with Text

Module 3 | 45 minutes | String processing | Grades 6–8 · ages 12–14

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. string ___ A. Reads the same forwards and backwards.
b. character ___ B. Join strings together.
c. concatenate ___ C. One letter, digit, space or symbol.
d. palindrome ___ D. A sequence of characters (text).

2. Plan your code

Before you build it: Vowel counter: a list vowels holds a, e, i, o, u. Ask “Type a word”, loop through its letters, and count how many are vowels. Say the count. Write or draw the blocks you will use.

3. Plan your code

Before you build it: Palindrome checker: ask for a word, build rev by joining each letter to the front, say rev for 1 second, then say “Palindrome!” if rev = word, otherwise say “Not a palindrome”. Write or draw the blocks you will use.

4. Trace the reverse

word = “code”. After the loop that sets rev to join (ch) (rev) for each letter, what is rev? Circle one.

a. A. edoc
b. B. code
c. C. cdoe

5. Strings in Python

What does this Python print? Code: word = "level" ↵ print(word[::-1] == word) ↵ print(len(word))

a. A. True then 5
b. B. False then 5
c. C. True then 4

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can loop through the letters of a string.
☐ I can count and build strings.
☐ I can test for palindromes.
