WORKSHEET · SCRATCH (GR 6–8) BEGINNER: CODE FOUNDATIONS

Lesson 7: Variables and Operators

Module 3 | 45 minutes | Variables, input and operators | Grades 6–8 · ages 11–14

Name: Class: Date:

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. variable ___ A. A symbol that calculates or combines values.
b. assign ___ B. Data the user gives the program.
c. input ___ C. Give a variable a value (set).
d. operator ___ D. A named place to store a value.

2. Plan your code

Before you build it: Click counter: when the flag is clicked, set clicks to 0. Each time the Bot is clicked, change clicks by 1 and say clicks. Write or draw the blocks you will use.

3. Plan your code

Before you build it: Adding machine: ask “First number?” and set a to answer; ask “Second number?” and set b to answer; then say “Total: ” joined with a + b. Write or draw the blocks you will use.

4. Trace the variable

score is 10. The program runs: change score by 5, then set score to 2, then change score by 3. What is score? Circle one.

a. A. 5
b. B. 20
c. C. 15

5. Variables in Python

What does this Python print? Code: x = 4 ⏎ y = x * 3 ⏎ x = x + 1 ⏎ print(x, y)

a. A. 5 12
b. B. 4 12
c. C. 5 15

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

☐ I can store and update data in variables.
☐ I can use user input.
☐ I can calculate with operators and build messages with join.
