Lesson 7: Lists: A Variable That Holds Many Things

Module 3 | 45 minutes | Lists | Grades 3–5 · ages 9–11

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. list ___ A. How many items are in the list.
b. item ___ B. The position number of an item (starting at 1).
c. index ___ C. One thing in a list.
d. length ___ D. A variable that holds many items in order.

2. Plan your code

Before you build it: Fortune Owl: when the flag is clicked, delete all of the fortunes list and add at least 3 fortunes. When the Owl is clicked, say a random item of fortunes. Write or draw the blocks you will use.

3. Item by position

The list colours holds: red, green, blue, yellow. What is item 3 of colours? Circle one.

a. A. blue
b. B. green
c. C. yellow

4. Plan your code

Before you build it: Shopping list: when the flag is clicked, delete all of shopping. Repeat 3 times: ask “What should we buy?” and add the answer to shopping. Then say the length of shopping. Write or draw the blocks you will use.

5. Explain your thinking

Why is a list better than making ten separate variables for ten names? Give an example from a game or app.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

- ☐ I can create a list and add items.
- ☐ I can read an item by position.
- ☐ I can pick a random item from a list.
