WORKSHEET · SCRATCH (GR 3–5) ADVANCED: ARCADE ENGINEERS

Lesson 10: My Blocks: Make Your Own Blocks

Module 4 | 45 minutes | Custom blocks (procedures) | Grades 3–5 · ages 9–11

Name: _____ Class: _____ Date: _____

Practise what you learned today. Read each task carefully.

1. Key words

Match each word to what it means. Write the letter.

a. procedure ___ A. Hiding the details behind a simple name.
b. define ___ B. A value you give the block when you use it.
c. input (parameter) ___ C. The hat that says what your block does.
d. abstraction ___ D. A named group of blocks you can use again (a My Block).

2. Plan your code

Before you build it: Square machine: make a block “square” with an input size that draws a square (repeat 4: move size, turn 90). When the flag is clicked, pen down and use your block three times with different sizes. Write or draw the blocks you will use.

3. Write once

You define “square (size)” and then use square (50) and square (80). How many times did you write the repeat 4 code? Circle one.

a. A. Once
b. B. Twice
c. C. Eight times

4. Plan your code

Before you build it: Greeter block: make a block “greet” with an input called name that says “Hello, ” joined with name for 1 second. When the flag is clicked, greet Asha, then greet Ben. Write or draw the blocks you will use.

5. Explain your thinking

Think of a game. Name a custom block you would make for it, what input it would take, and why it makes the code better.

How did it go? Colour a face: 😀 I can do it · 🙂 Nearly there · 🤔 I need help

- ☐ I can define a custom block.
- ☐ I can give it an input and use the input.
- ☐ I can explain why custom blocks help.
